-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, line 5, "some W" is not a clear description. Claim 2, line 2, "movemenets" is not spelled correctly.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1725

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 4,710,605 to Presby in view of USPN 5,457,567 to Shinohara. Presby discloses the substantial limitations of the claims. Shinohara discloses the well known modulator and light trap. The use of a disengaged operative beam in Presby would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the modulated beam is controlled in intensity. The adjustment of parameters for the operation of particular apparatus would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art depending on the particular work piece and depending on the available apparatus. The use of the method on a fiber bundle in place of the fiber disclosed by Presby would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art as being a change in size and/or shape of the work piece, but not as a change in kind.

Claims 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 4,710,605 to Presby in view of USPN 5,457,567 to Shinohara as applied to claim 1 above, and further in view of USPN 4,467,168 to Morgan et al. Morgan et al disclose well known gas at the laser nozzle used for cutting glass. The use of gas for ejecting material vapors is very well known and the use of gas in Presby would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the clean work surface provides a more uniform work surface.

Art Unit: 1725

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to cutting fiber.
